

X TREME FUEL TREATMENT

Remove cap from reservoir side of bottle and squeeze desired amount up into reservoir.

Pour XFT™ from reservoir into fuel tank sideways to prevent the product from going back down the feeder tube.

Just one ounce of XFT™ treats up to 80 gallons of fuel making this product the most comprehensive fuel treatment available.

4 Key Benefits

XFT™ is a break-through product which produces results in four key categories:

1. Increases Gas Mileage

Reduces fuel consumption resulting in increased miles per gallon.*

2. Prolongs Engine Life & Reduces Engine Wear

A cleaner and more lubricated engine means longer engine life and reduced wear.

3. Improves Vehicle Performance & Horsepower:

Burns more of the available BTU's in the fuel resulting in better performance.

4. Reduces Harmful Emissions & Pollutants:

Reducing harmful pollutants from the exhaust pipe results in a cleaner environment.

*Studies show a significant increase in fuel economy and engine life as well as environmental benefits. However, individual results may vary depending on driving habits, age of vehicle, weather, traffic, terrain and other variances.

How it Works

Xtreme Fuel Treatment™ contains a fuel catalyst referred to as a 'burn rate modifier'. The burn rate modifier reduces ignition delay, which provides a significant, corresponding reduction in combustion temperature. By reducing ignition delay, the fuel reacts to combustion quicker, allowing for a longer, more complete burn. This improved combustion results in burning more of the available BTU's of the fuel. A more complete burn improves engine performance, reduces harmful emissions significantly, and reduces fuel usage.

Enabling a more complete burn process means you use less fuel and consequently increase your trucks fuel mileage.

A more complete burn process increases the available horsepower and torque, thereby improving your engine's power.

A better burn also results in less carbon buildup on engine parts and fewer emissions from the exhaust pipe. Less carbon buildup means less wear on the engine which can translate into fewer repairs and extended engine life.

Components of Xtreme Fuel Treatment™

XFT™'s unique formula contains many ingredients, each designed for a specific purpose:

Combustion Catalyst – Extends the burn rate of fuel during combustion to provide a more complete fuel burn resulting in increased gas mileage, fewer harmful emissions and less carbon buildup on engine parts.

Detergents – Removes harmful deposits from fuel pumps, injectors and throughout the fuel system.

Lubricants – Provides lubrication to pistons, fuel pumps and injectors, reducing friction and prolonging the working life of the engine.

Fuel Stabilizer – Prolongs the life of stored fuel; ideal for seldom used equipment.

Polymerization Retardant & Dispersant
Reduces sludge buildup in fuel which can plug filters.

Rust and Corrosion inhibitor – Prevents tank and fuel system corrosion caused by oxidation and condensation.

Demulsifier – Helps remove water from fuel.
