To Whom it May Concern,

Many times we get asked the question “Is Xtreme Fuel Treatment safe for my engine?” or “Will XFT damage my engine like some other fuel additives will?”

The answer is this: XFT is perfectly safe for all engines, petrol (gasoline) and diesel. In its 20 year history XFT has never harmed a single engine and we are perfectly confident that it never will.

Here are some reasons that we know this to be a fact:

- 🔥 XFT has over 4 Billion Kilometres (2.5 Billion Miles) of operation.
- 🔥 XFT has over 65 Million hours of successful run time in engines.
- 🔥 In over 20 years there has never been a claim against XFT
- 🔥 Syntek Global does have a large insurance policy, but has never had to use it.
- 🔥 The Magnuson-Moss Act (passed by the United States Congress) says that using a fuel treatment like XFT cannot affect your engine’s warranty. Why? Because they know it will not harm your engine!
- 🔥 We do not change the fuel specifications so there are no warranty issues involved. This was proven through testing by the ASTM.
- 🔥 There have been hundreds of tests and studies done by independent laboratories, universities, and others. All were able to document the positive benefits, and none found any negative effects.

We hope this will serve as sufficient evidence that this product is extremely safe and also very effective. We are confident in our product enough to put a money back guarantee on it as well.

XFT. Trusted because it works.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joel Theler'.

Joel Theler  
CEO, Syntek Global Inc.
